

Module: Employee Profile

Purpose

The **Employee Profile** module is used to **create, view, search/filter, update, and manage employees** who will access and work in the Lab Management System. It stores:

login credentials (username/password)

personal details (name, DOB, guardian/spouse name, gender)

contact & address info

role/profile mapping (system access)

optional certificate settings

signature upload

status (Active)

Primary Users

Admin / Super Admin

- Adds employees
- Assigns profile/role permissions
- Edits employee details
- Enables/disables invoice view option

QA / Dev

- Verifies form validations, CRUD, permissions mapping, UI behaviour

Employee Profile – View, Search, Add, Edit & Manage Employees

User Story

As an Admin, I want to view, search, add, edit, and manage employees, **so that** system access and permissions are properly controlled.

Employee List Screen

This screen displays all existing employees in a table and allows basic management actions.

Available Actions

- **+ New Employee** – Opens the Add Employee form
- **Columns** – Customize visible table columns
- **Actions** – Bulk actions (if enabled)
- **Search** – Quick keyword search
- **Filters** – Advanced filtering

Table Columns – Detailed Explanation

- **Employee Id** – Unique system-generated or assigned employee code
- **S.No** – Serial number for table reference
- **Employee Name** – Full name of the employee
- **Employee Username** – Username used for login
- **Profile Name** – Assigned system role/profile
- **Father Name** – Father's/guardian's name
- **Date of Birth** – Employee date of birth
- **Status** – Current status (Active/Inactive)
- **Edit** – Pencil icon to update employee details
- **Delete** – Trash icon to remove employee record

Search & Filter Employees

As an Admin, I want to filter employees using specific criteria, **so that** I can quickly locate a particular employee.

Filter Fields – Explanation

- **Employee Id** – Filter by employee code
- **S.No** – Filter by serial number
- **Employee Name** – Filter using full or partial name

- **Employee Username** – Filter by login username
- **Profile Name** – Filter by assigned role/profile
- **Father Name** – Filter using guardian name
- **Date of Birth** – Filter by DOB using date picker
- **Status** – Filter by Active/Inactive

Behaviour

- **Apply** – Applies selected filters
- **Clear All Filters** – Resets filter fields

Add / Edit Employee

As an Admin, I want to add or update employee details, **so that** employee information, roles, and permissions remain accurate.

- The same form is used for **Add** and **Edit**:
- In **Edit**, existing data is pre-filled
- Username is **non-editable** during edit

Login Information (Detailed)

- **Username***
The unique login ID for the employee.
This field is mandatory and becomes **read-only during edit** to maintain login integrity.
- **Password***
Password used to log in.
Must be between **6 to 15 characters**.
Eye icon allows visibility toggle.
- **Confirm Password***
Must exactly match the password field.
Submission is blocked if values do not match.

Personal Information (Detailed)

- **Name***
Full name of the employee as it appears across the system.

- **Father's/Husband's Name***
Guardian or spouse name, used for record and compliance purposes.
- **Date of Birth***
Employee's DOB selected via date picker.
- **Type***
Title selection (Mr., Ms., etc.).
- **Employee Code***
Unique identifier assigned to the employee.
Appears in employee list and reports.
- **Gender***
Radio selection for Male or Female.

Mailing Information (Detailed)

- **Address***
Current mailing/communication address.
- **City***
City corresponding to mailing address.
- **State***
State selected from dropdown.
- **Postal Code**
PIN/ZIP code.
- **Office Email ID**
Official email address used for communication.
- **Telephone No.**
Optional landline number.
- **Mobile No.***
Primary contact number. Mandatory.

Permanent Address Information (Detailed)

- **Same As Above**
When checked, permanent address fields are auto-filled from mailing address.
- **Address / City / State / Postal Code / Telephone No.**
Permanent residential address details.

IP Restriction & Assigning Role (Detailed)

- **Static IP**
When enabled, restricts login to predefined IP address.
- **Select Profile***
Defines system access permissions (role-based access).
- **QA Profile***
Assigns QA/operational role mapping.
- **Invoice View Allow**
Toggle to allow or restrict invoice visibility.
- **Upload Signature**
Upload employee signature (JPG format, max 5MB).
Used in reports/invoices where applicable.

Certificate Settings (Optional – Detailed)

- **Certificate Password**
Optional password (minimum 8 characters) used for digital certificate generation.
- **Certificate Name**
Name to appear on certificate. Defaults to employee name if not entered.

QA Verification Points

- Mandatory field validation
- Password and confirm password match
- Username uniqueness and lock on edit
- Role and QA profile mandatory enforcement
- Signature upload format/size validation
- Invoice view permission behaviour
